

For Immediate Release (Feb. 18, 2010)

New Rochelle, NY– Transpo Industries, Inc. announces a new product: **T-78 Polymer Crack Sealer**

T-78 is a low viscosity, methyl methacrylate resin system that is highly effective for sealing and filling cracks in concrete. It bonds well to the inner walls of cracks, restoring strength and preventing crack propagation.

T-78 Polymer Crack Sealer is capable of rapid cure in a wide range of temperatures. The application process requires minimal labor costs, reducing the need for specialized equipment. Its fast cure time (under one hour) assures a quick return to service. T-78 is ideal for bridge decks, industrial floors, concrete roads, parking garages, aircraft runways and hangars.

Transpo Industries is ISO 9001:2000 certified.
